

Kanban Board Project Week 24 Deliverables

(February 3, 2025 - February 7, 2025)

Objective:

Progress with app design and feature development, ensuring that all components align seamlessly with the Figma designs and user expectations. Emphasize rigorous testing and documentation to solidify the foundation for upcoming development stages. Foster a collaborative environment with continuous feedback and iteration across all teams.

Backend Team Deliverables:

- **February 3, 2025: API Development and Integration Support**
 - **API Development:** Continue developing essential APIs that facilitate the new features identified by the frontend team.
 - **Integration Support:** Provide support to the frontend team for seamless integration of new APIs with existing frontend components.
- **February 4, 2025: Performance Optimization and Security Enhancements**
 - **System Optimization:** Enhance system performance to handle an increased number of user interactions and data processing.
 - **Security Updates:** Update and strengthen security protocols to safeguard all new and existing APIs.
- **February 5, 2025: Testing and Troubleshooting**
 - **Integration Testing:** Conduct integration tests to ensure that all systems work together without issues.
 - **Troubleshooting:** Address any issues found during testing to ensure robust backend support for frontend needs.
- **February 6, 2025: Documentation and Reporting**
 - **Documentation Update:** Continuously update the technical documentation to reflect new developments and API details.
 - **Progress Report:** Prepare a comprehensive progress report detailing the week's achievements and obstacles for discussion in the weekly meeting.
- **February 7, 2025: Code Review and Final Adjustments**
 - **Code Review:** Perform a detailed review of the recent codebase updates to ensure code quality and adherence to standards.
 - **System Adjustments:** Make final adjustments to the backend systems based on feedback from the frontend team and test results.

Frontend Team Deliverables:

- **February 3, 2025: Feature Implementation and Initial Testing**
 - **Feature Development:** Start development on at least one crucial feature that was identified as a priority from the previous week.
 - **Initial Testing:** Perform tests on these new features to ensure they function as intended and align with the Figma designs.
- **February 4, 2025: UI Enhancement and Integration**
 - **UI Adjustments:** Make necessary adjustments to the UI based on the latest design feedback and integration requirements.
 - **Integration:** Ensure that new features integrate flawlessly with the backend APIs for smooth functionality.
- **February 5, 2025: Performance Optimization and Feedback Incorporation**
 - **Performance Tuning:** Optimize the frontend for improved speed and responsiveness.
 - **Feedback Integration:** Incorporate feedback from early testing to refine and improve the user interface.
- **February 6, 2025: Documentation and Code Management**
 - **Documentation Update:** Update all frontend documentation with detailed descriptions of developments and modifications made during the week.
 - **Code Management:** Ensure all code is well-documented, reviewed, and pushed to GitHub.
- **February 7, 2025: Final Testing and Review**
 - **Final Testing:** Conduct comprehensive testing to confirm that all new features are fully functional and meet design specifications.
 - **Review Session:** Organize a review session to ensure all components meet the project standards and design requirements.

UI/UX Team Deliverables:

- **February 3, 2025: Design Refinement and Comments Integration**
 - **Design Improvements:** Continue refining the current designs based on the ongoing feedback from the development and user testing.
 - **Comments Integration:** Complete the integration of comments and suggestions to enhance the design functionality.
- **February 4, 2025: App Template Development**
 - **App Template Creation:** Start the creation of the app template based on the refined designs and prepare it for integration testing with the development teams.
- **February 5, 2025: User Testing and Design Adjustments**
 - **Prototype Testing:** Conduct user testing sessions on the app template to ensure its usability and functionality.
 - **Design Adjustments:** Make necessary design adjustments based on user feedback and testing outcomes.
- **February 6, 2025: Final Design Documentation and Handoff**

- **Design Documentation:** Update and finalize all design documentation to include the latest changes and ensure clarity of design intentions.
 - **Design Handoff:** Provide the final design assets to the development teams, ensuring a clear understanding of all design elements.
- **February 7, 2025: Final Design Review and Adjustments**
 - **Comprehensive Review:** Conduct a comprehensive review of all designs with the development teams.
 - **Final Adjustments:** Make last-minute adjustments to the designs based on development team feedback and prepare for the next phase of deployment.
