

Kanban Board Project Week 31 Deliverables

Objective:

Continue developing the new feature and refine the redesigned app UI. Focus on completing core functionalities, thorough testing, and enhancing user experience. Strengthen backend-frontend collaboration and prepare for feature demo.

Backend Team Deliverables:

March 25, 2025 - Feature Completion

- Finalize implementation of remaining API functionalities.
- Ensure all database models and migrations are complete.
- Conduct code review and refactor where needed.

March 26, 2025 - Testing & Bug Fixes

- Run integration tests covering all backend modules.
- Fix any bugs found during testing.
- Validate data consistency and security measures.

March 27, 2025 - Documentation & Final Touches

- Complete technical documentation for all backend modules.
- Ensure consistent logging and error handling.
- Push final backend code updates to GitHub.

March 28, 2025 - Backend Support & Collaboration

- Assist the frontend team with any API-related issues.
 - Review logs and handle any deployment-related queries.
 - Participate in final QA checks with other teams.
-

Frontend Team Deliverables:

March 25, 2025 - Feature Implementation Wrap-Up

- Complete development of remaining UI components.
- Polish responsiveness and ensure accessibility compliance.
- Validate alignment with latest UI/UX designs.

March 26, 2025 - Testing & Bug Fixes

- Conduct full UI and UX testing on different devices.
- Address reported bugs and performance issues.
- Validate API consumption and data rendering.

March 27, 2025 - Final Integration

- Perform end-to-end testing with full backend integration.
- Apply visual polish and animations.
- Finalize and push frontend code to GitHub.

March 28, 2025 - Demo Preparation

- Prepare frontend for internal feature demo.
 - Coordinate with UI/UX team for final look checks.
 - Confirm readiness for user acceptance testing (UAT).
-

UI/UX Team Deliverables:

March 25, 2025 - Usability Review

- Conduct usability testing and collect internal feedback.
- Identify areas of friction and improvement.
- Provide updated assets if required.

March 26, 2025 - Refinement & Review

- Fine-tune UI details including spacing, typography, and interactions.
- Collaborate with frontend to ensure design fidelity.
- Address usability feedback.

March 27, 2025 - Final Assets Delivery

- Deliver any remaining assets or icons.
- Ensure UI documentation reflects final state.
- Support frontend in applying last-minute style updates.

March 28, 2025 - Demo Support

- Assist with final UI polish for demo.
- Ensure visual consistency across devices.

- Provide backup design support during QA checks.
-

General Team Deliverables:

- **Clockify Tracking:** Log work hours daily.
- **Weekly Sync Meeting (March 26, 2025):** Align development progress and address blockers.
- **Retrospective Discussion (March 28, 2025):** Evaluate accomplishments and plan for next sprint.
- **GitHub Updates:** Ensure all code and documentation are committed and pushed.
